PERSONAL STATEMENT

Web Developer with 2+ years of experience in designing and developing user interfaces, testing, and debugging. I have been involved in many projects such as China remote web development, New Zealand local commercial web development. I have got a good team spirit and have been active in communicating with the team. I have been able to plan time reasonably, and I have been skillfully using Front-End development tools in project development, such as HTML5, CSS3, JavaScript, jQuery, Bootstrap, React, and relevant technical skills. In the development process of each project, I have made 100% investment and I get the appreciation of the client and project manager.
